

## Good practices INCL\_4080A\_EN

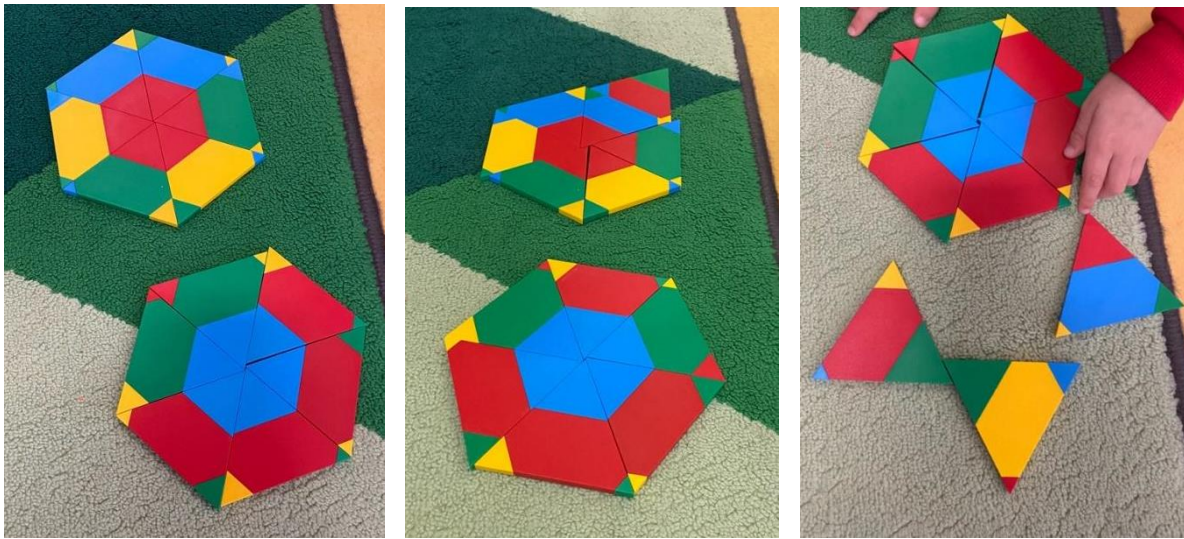

Author's name and institution: **Inês Martins, Graça Bidarra, Piedade Vaz-Rebello, Vanda Santos**, Universities of Coimbra and Aveiro

Description of the problem/exercise: **A three years old boy explored the Poly-Verse**

A three years old boy explored the Poly-Verse and made some of the following constructions (Figures 1-7), based in his own narrative:

Figures 1, 2, 3: Constructions with squares

Figures 4, 5, 6: Constructions with triangles

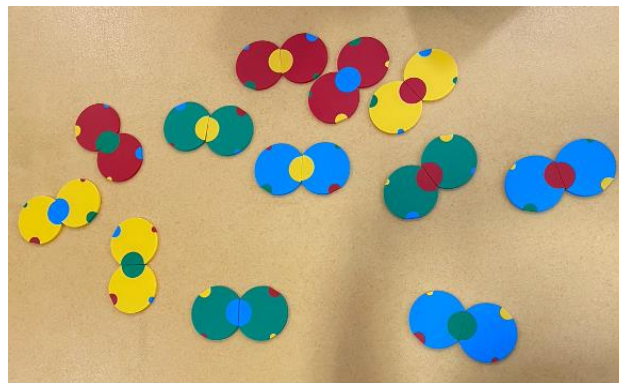

Figure 7: Construction with circles

- *Why this exercise is good:* Develops fine motor skills, creativity and logical thinking
- *Which level is recommended:* Pre-school. This exercise was developed by very young children. Educators are proposed to work with this target group.
- *School subject(s):* The constructions were associated with narratives developed by the child
