Description of the problem/exercise: **Creation of a given number or letter**

Type: Games for practicing collaboration, speaking and listening

The game is played in groups of four or five by using three different Poly-UNiverse sets. Each group has the same number of basic elements. The members of each group have to put together as many tiles as possible in order to create a chosen number or letter. The students can also calculate the area of each solution.

- *Why this exercise is good:* It develops creativity, problem solving, communication skills, collaboration skills and organizational skills.
- *Which level is recommended:* Primary school
- *School subject(s):* Arts, language, communication
- *Comments:* For ages over 5 years
