

## Good practices INTER\_521CD\_EN

Author's name and institution: **Filip Mačković and Dragan Maževski**, students of Subotica Tech – College of Applied Sciences, Subotica

Description of the problem / exercise: **Representation of investors' attitude**

Each Poly-Universe square element represents one investor or businessman. Each color represents one sector in which that investor invested his money. This exercise would be used as a visual presentation to show how different investors think and in which sector each businessman has invested their money. For example, the red color can represent art, the blue color can represent start-up companies, the red color is the car industry, and the yellow color can represent cryptocurrency.

- *Why this exercise is good: This exercise is good because it can be used to make a simple presentation so that people who are new to economics and investing can understand more complex economic concepts.*
- *Which level is recommended: High school and faculty*
- *School subject(s): Economics*
